

Tuesday April 2, 2019

IEEE RFID “Tech Tuesday” Workshops

Track 1	Track 2
8.30 – 10.00 AM RFID Past, Present, and Future Gregory D. Durgin Georgia Tech	
10.30 – 12.00 PM Integrated On-Chip Antennas for Efficient Energy Harvesting in Single-Chip RFID/Sensor Systems Carnegie Mellon University	10.30 – 12.00 PM Real world case studies of microchip implants Katina Michael and Team Arizona State University / University of Wollongong
1.00 – 2.30 PM RFID in Healthcare Paul Frisch Memorial Sloan Kettering Cancer Center	1.00 – 2.30 PM Large-scale survey results on perceptions of implantable usage Katina Michael Arizona State University / University of Wollongong

Peer2Peer Roundtable

3:00 – 4:30 PM

Past and Future of RFID in,

Track 1 – Antenna and Propagation

Track 2 – Circuits, Devices, and Interrogators

Track 3 – Application, Sensors, and Security

An industry and academic lead in each group to facilitate the discussion.
